... be happy with Happy Spa

Every one of us enjoys happiness in its own way and it is not a secret that the biggest joy for all of us, is to be healthy. Joy is to have a great family and friends who you can count on, with whom you can meet up, have fun and enjoy the everyday life. We are happy, when we are content. We also like to share our happiness. Happiness is like a mosaic compound of little joys, which we are able to enjoy.

When we rise above our daily problems, when we forget about stress that surrounds us constantly, when we relax, then we suddenly wise up to our happiness. But let's be honest - nowadays it is getting harder and harder to learn how to relax. Not everyone is capable of that though it brings you precious strength and energy. With Happy Spa relaxation is not a problem. All you have to do is to open the cover and slip into wonderful hot spa water. Our spas are able to change your stressful day into holiday...

When you say spa...

The basic of a spa is a vacuum formed acrylic shell. The spas have various dimensions and capacities, variable numbers and location of seats, benches or loungers, each of which has a given number of jets to massage individual parts of the body. The most typical features of spas are the wooden cabinet, in which the spa is fixed, and cover protecting the water level and preventing energy losses.

Location is up to you...

Spas are designed for all year round use in the garden, on decking or in the garden patio. They can definitely be installed indoors – a pool room, conservatory or home gym. The Spa in a cabinet can be easily placed on a solid surface or built in the ground without a cabinet.

... feel the pure happiness

A spa remains filled with water that is continuously heated to a required temperature as the optimum temperature for hydrotherapy is a recommended 37°C to 39°C. The equipment set includes filtration system that keeps water clean. The standard equipment includes the ozonator that destroys microorganisms, and considerably decreases consumption of chemicals needed for sanitizing the spa water. You can fully enjoy your relaxation – everything is being looked after for you.

Spa is definitely the best investment to your family's health and well-being

Do you know how the spa water affects the aching body and tired soul? Beneficially! And that is due to the coordination of several factors. Nevertheless, water directed at different strengths and directions is the elemental factor.

Total relaxation and the feeling of weightlessness will give you back your strength within twenty minutes. And even more – it helps to heal.

Hydrotherapy stimulates generation of endorphins which accelerate relieve from pain and exhaustion. Flowing warm water helps to ease tension and pain in muscles and decreases psychical anxiety.

Your stay in spa will bring you a feeling of euphoria, relaxation and calmness. The overall relaxation creates physical and mental peace.

Happy Spa

We would like to introduce you our new range of Happy spas designed for those who are ready to enjoy relaxation, joy, happiness and lots of fun. Reasonably priced Happy Spas are for everyone. These 6 models will hold your interest not only by their comely design done by our designer Petr Slanina, but they will also inspire you by the unique colorful combinations of the shell, cover and cabinet.

Happiness is colorful,

Create your own original spa.

Shell /cabinet /cover

Copper/Orange/Pumpkin

The color of today, the most fashionable color - it is orange, indeed. If this color gets you, then you can have it on the outside of your spa and inside in the pearly finish too. Shell in Copper, plastic cabinet corners in orange and orange cover.

Up to 180 possible color combinations!

White Pearl/Yellow/Banana

We can light up your smile and recharge your battery! Our weapon is pearly shell in White Pearl, yellow cabinet corners and yellow cover to match.

Tahoe/Blue/Plum

Blue color is known for its calming and relaxing effects on our mind. Do you long for maximum relaxation? No problem! Just go ahead and choose shell in a pleasing Tahoe and plastic corners and cover in blue. Blue is goooood....

Protective by community design.

happiness is „in“

Bluegrass/Green/Lime

Grass on grass? Why not?!
Decide for the green color
and you cannot go wrong.
Green supports vitality and
it also replenishes our
energy. Your choice is then -
the shell in Bluegrass, green
plastic corners and finally green
cover to complete it.

Sahara/Red/Strawberry

Red color provokes our mind and
gives us a lot of energy. How
about „a date with red“? It
certainly will not be boring!
Choose your favorite and
very practical shell in Sahara
and combine it with corners
and cover in teasing red.

Let's play with the colors...

Sahara/Grey/Fruitstone

Are you not mad about brisk colors? Do
you prefer traditions and style? Then
you must find the combination of
elegant Sahara with grey cabinet
corners and grey cover the
right thing for you!

Color combinations introduced to you so far, are just our given advice. The final combination is entirely up to you....

Silvester

This spa provides enough space for every day family relaxation as well as for crazy New Year's Eve party. It is the largest spa out of the Happy Spa range. It offers 4 comfortable seats, 1 lounger and other extra places. It cannot be more comfortable. Perhaps, a little waterworks, which you can spice up the spa relaxation with, could complete the heaven on Earth...

Noel

Noel is defined by its neat lines and simple but efficient interior. Water jets set into a spiral ensure that your whole back is being properly massaged. All you need to do is just to move around. The layout of water and air massage jets together with moderately structured interior offers enough space for finding your own massage position.

Shell Dimensions	Ø 200 x 90 cm	Handrail	2x
Dimensions with Cabinet	Ø 200 x 97 cm	Pillows / color	-

- Air Jets	10	Pressure Filtration	yes
TurboBoost system	Central	Ozonator	UV ozone
Boost Control regulace	1	Heater	2 kW
		Operation and Protection System	Nordic

Bob

Bob is a basic model of the Happy Spa range with limited equipment. It represents an economy "entry" type of spa. Equipment and its extent conform to the low end-price but the high quality, typical for all USSPA products, is kept. Simple interior is spacious enough for up to 4 people at a time. Bob is supplied in one color combination only – the shell in Sahara with plastic corners and cover in grey.

Shell Dimensions	195 x 199 x 79 cm	Handrail	-
Dimensions with Cabinet	195 x 199 x 86 cm	Pillows / color	-
Water Capacity	970 litres	Light	1 intensities/2 color filters
Spa Weight - dry / filled	310/1 280 kg	Cover / Color Selection	yes/1

- Water Jets	9	Air blower	-
- Air Jets	-	Pressure Filtration	yes
TurboBoost system	-	Ozonator	UV ozone
Boost Control regulace	-	Heater	2 kW
		Operation and Protection System	Nordic

This is Happy Spa.

Acrylic

- The spa shell is vacuum formed from first-class quality acrylic which ensures long life, environmental resistance, and resistance against chemically treated water
- It is pore-free and easy to maintain

Lounger

- Comfortable lounger is a very popular massage position. Group of jets massage the whole body all the way to the toes

Air Jets

- Air jets are placed on the bottom of the seats and lounger
- Air massage targets the skin and intensifies the feeling of weightlessness

Pillow

- The lounger and deep seats are furnished with comfortable pillows

Place for glasses

- A good drink is certainly a part of good relaxation. You can place your glass aside on specially shaped places

Antislip bottom

- The antislip surface of the bottom for safety within the spa

Hand rail

- Shaped hand rail for your comfort and safety

Suction

- Bottom water suction; water is then forced under pressure into the filter

Skimmer

- Skimmer sucks water from the water level; water is then forced down to the filter

Water Jets

- Happy Spas are fitted with various groups of water jets in order to reach optimal massage effect
- There are six types of jets to be found on Happy Spas; the jets provide directional, rotational or whirly flow

Filter barrel with cartridge

- An important part of Happy Spa equipment is a top pressure filtration system integrated with ozonator which decreases the use of chemicals; Its contribution to low maintenance is substantial

TurboBoost system

- Water and air massage systems are connected into the unique TurboBoost Central system enabling a smooth control of massage intensity

Control panel

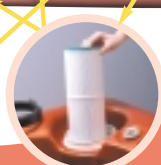

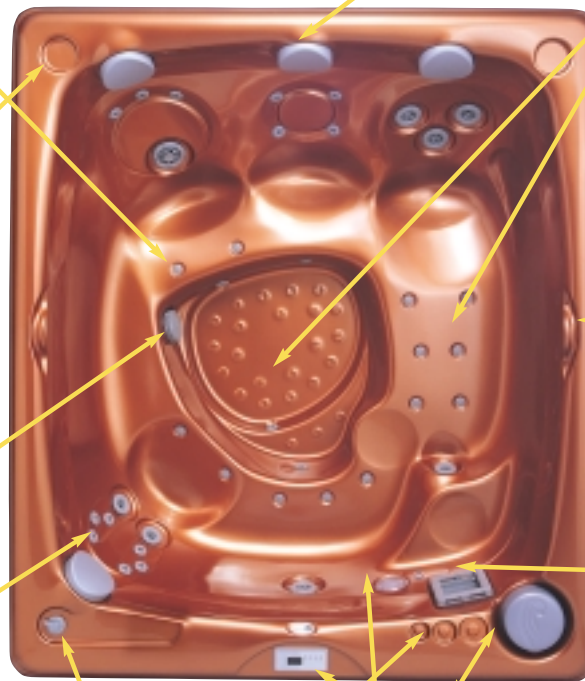

- You can control the massage pump, blower and light on the top control panel with electronic display
- The control panel is also used to a set up water temperature, filter cycle, etc.

Waterworks

- Space for Waterworks
- lighted Waterworks is an extra accessory available only for Happy Spas (except from Noel and Bob)... enjoy the new dimension of relaxation.

Light

- Pleasant night atmosphere will be raised by integrated lighting with two color filters
- As an accessory, you can buy multifunctional Rainbow Light

Cover

- Covers spa at time when it is not in use
- Essential part of the insulation system of spa: retains heat, humidity, protects the water against UV light and protects against impurities from outside
- Allows the whole year round use with low cost
- Choose from six colors of cover with a Happy Spa structure - unique colors of the cover will light up your Happy Spa

Thermoguard insulation

- The space between the shell and cabinet is filled with sophisticated Thermoguard insulation, which has excellent insulative features and, at the same time, it keeps easy access to the whole spa system at any time

Cabinet - plastic corners

- Exceptional combination of natural material and plastic corners in lively colors. That is the new fashion trend in the spa world.
- Corners are formed from resistant Perspex and you can choose from six different colors

Cabinet - Thermowood

- Happy spas are also fitted with Thermowood cabinet as a standard
- Thermowood does not require any special maintenance; it is characterized by a long life-time with lasting natural look

Equipment

- The equipment is stored inside the cabinet and it is accessible through a door with locks
- Technical background includes electric heater, two-speed water pump, air blower and ozonator
- The brain of the whole device is the electronic control unit made by leading world producer

Pan

- Cabinet is cleverly closed by fiberglass bottom which protects spa and its equipment from water or rodents
- For comfortable water drainage an outlet is fitted in the pan

USSPA – quality, innovation and reliability

Happy Spa range is the news of 2006 in the USSPA's production. Flagship of USSPA's production is the luxurious Universum Spa line.

USSPA was founded in 1995. Originally, the company was assembling spas from imported shells and components from American producer. By starting its own production of exclusive commercial spas in 2002 USSPA became the first and only acrylic spa producer in the Czech Republic and one of the first in Europe. In 2003 USSPA introduced its own Swim spa and the first three models of Universum Spa range later that year. Today, USSPA belongs among the top European producers and successfully exports its products to 21 countries in Europe.

USSPA has been retaining its leading position on the Czech spa market for several years thanks to original and functional design, high quality standards, professionalism and consistent customer care. This was also approved by obtained ISO 9001, ISO 14001 and TÜV certifications.
